

Health through Oral Wellness[®]

When it comes to oral health, we know some people need more care than others. ODS Community Dental's Health through Oral Wellness[®] program offers extra benefits to members who have a greater risk for oral diseases.

The program uses a clinical oral health assessment to identify which of your patients are at risk for caries, periodontal disease and oral cancer. Based on your patient's risk scores, they may qualify for enhanced benefits including additional cleanings, fluoride treatments, sealants and periodontal maintenance. ODS offers this program at no cost to our providers.

The program includes access to Dentalytics[™], an online data analytics tool that allows you to track patients due for preventive services including those with a history of periodontal disease that are due for their treatment.

Ready to get started?

To help your high-risk patients get the extra dental benefits and related care they need, you must be signed up through PreViser[™], a third-party dental risk and periodontal disease application.

Just follow these simple steps to get started:

- Sign up at my.previser.com/signup/ddor.
- Complete the request fields and click Register.
- You will receive an email from PreViser asking you to validate and complete your registration by going to previser.com and selecting 'My Account.'

Visit deltadentalOr.com/oralwellness/providers to learn more about the program.

We're here to help

Our Health through Oral Wellness support team is available for on-site training and assistance with incorporating the risk assessment tool into your daily routine. Call us at 844-663-4433 to schedule a PreViser and Dentalytics demonstration. Already using the program? Call us to schedule a complimentary training session.
